ATMOSPHERIC EMISSIONS

Leading solution for the continuous control of atmospheric emissions

Environmental regulations control

Control bits and gross-parameter reading for the application of the calibration line (QAL2), standardisation and confidence interval

Flow chart for each tag

Average calculation, ELVs, alarms, conditions, totalizers…

Control of critical situations such as Unavailability, Abnormal Operation Periods, Invalid Ranges…

Control via the MS Excel add-in and control panels, all of them user-customisable

Complies with: UNE-EN 14181 mCERTs EPA United States Environmental Protection Agency

ENVIRONMENTAL CONTROL
COMPLIANCE

EXCEL ADD-IN FOR CONTROL REPORTS AND SUBMISSION TO THE AUTHORITIES

By using templates created by the user, the system generates compliance reports related to environmental regulations. It complies with the information requested by EPA regulations, UNE-14181 and with the Royal Decrees and Technical Instructions for your Environmental Authorisation (EA).

CUSTOMER SATISFACTION

"VisualCEMS is a very powerful tool, reliable and user-customisable. It provides a picture of the status of your emissions and helps you comply with environmental regulations. It is a great step in the development of environmental control software."

F. Brunet
Department Manager, DOW

WEB REPORTS JUST ONE CLICK AWAY

Customers use the web to run reports by selecting the desired date range; this way, they can access results in PDF or Excel format.

CUSTOMERS AND OUR SOLUTION

Our best guarantee comes from our references in emission control for industrial plants in sectors as diverse as Cement, Plastic, Chemical, Petrochemical, Energy, Fragrance, Drinks and Glass. International engineering customers also rely on our solution for their projects.
